Initializing

1.There is no movement from carriage and screen shows initializing.
Reason:

The screen can not send initialization command to mainboard or the mainboard fails.

Check with following steps:

1-1 Check the cables connection in good condition between screen and mainboard.

cable Connecticut on screen

J29 Control panel port on mainboard

1-2 Replace mainboard or rewrite the program of mainboard.

Please refer to file on **How to update program of mainboard**.
