Printer Highlights

Printing Possibilities

LIMITED ONLY BY YOUR IMAGINATION

Custom Cosmetics

Direct print and personalize various cosmetics / make up and beauty care products: rounded or rectangular lipsticks and lip gloss, eye shadow cases, face cream jars, hand cream tubes etc.

Smartphone Accessories

Print on any model and brand. From iPhone, Huawei, Samsung and other available mobile brands, print real photos on different materials protective cases (silicone, acrylic, leather etc.), and also on AirPods or other earphone cases, chargers and power banks, phone grip holders...

RFID / Barcode / VDP Cards Print

Print several card types and pieces / pass at fast speed, even with touchable embossed numbers & letters: name badges, visitors badges, FUZE cards, smart cards, ID cards, VIP cards, membership cards, discount vouchers cards and many more.

Small packaging and gift boxes

Add more value for your customers by customizing not just the product, but the packaging of different materials: gift wooden boxes, jewelry boxes, cosmetics and beauty products cardboard packaging, chocolate and candy boxes, even music and video CD covers!

Amazing Print Effects

ACHIEVED IN NO TIME

3D Embossed Touchable Colors

The 3D textured print increases the value of the printed products and makes them memorable by being able to actually feel with your fingers the details of the printed design.

Bright & Shine Color Effect

Highlight specific texts, images, or logos to create an elegant dramatic bright color effect and attractive look. Enjoy smooth, and shiny surface of the printed substrates.

Vivid & True Photo Quality

Richer and vibrant colors with fast print drying due to LED UV instant curing process.

Braille Dots Printing

Benefiting from the BPAP unique technology for Braille, artisJet proV6 A5 mini UV LED printer will enable you to print small Braille applications including Braille education tools, Braille signs, door signs, entrance and exit signs, facilities sign, name insert signs, in accordance to USA Braille official standards.

Design at Your Fingertips

FROM YOU TO THE LOVED ONES

Quickly personalize selected products for your day to day business performance by adding your own or customer's real photos, custom designs, stickers, emoji, text input, logos, patterns, love and appreciation messages to celebrate their loved ones and special occasions.

Business Companion

CUSTOMIZED ON YOUR OWN TERMS

Flagship in-stores & Workshops

It is ideal for in-store use, as it not only prints true quality photos and artwork, but also provides workflow efficiency, and direct customer interaction.

Events & Activities

By using personalization on site becomes a lot easier at the same time as it gives the event a more professional profile and high customer interaction.

At Home & Online Businesses

The proV6 has the right dimensions for your day to day performance with custom products, anywhere you are.

Shopping Mall Gift Kiosk

artisJet proV6 A5 LED UV printer is best suited for professionals and small business purposes as it provides fast, speedy and perfect digital color printouts.

Eco-friendly System

SEAMLESS PRINTING EXPERIENCE

Professional Air Purification System

The printer reduces emission of the pollutants and ensures that all usages of the LED UV printers are harmless, keeping the air clean, with a wind of 150 CMB/ Hour.

Intelligent Air Cooling System

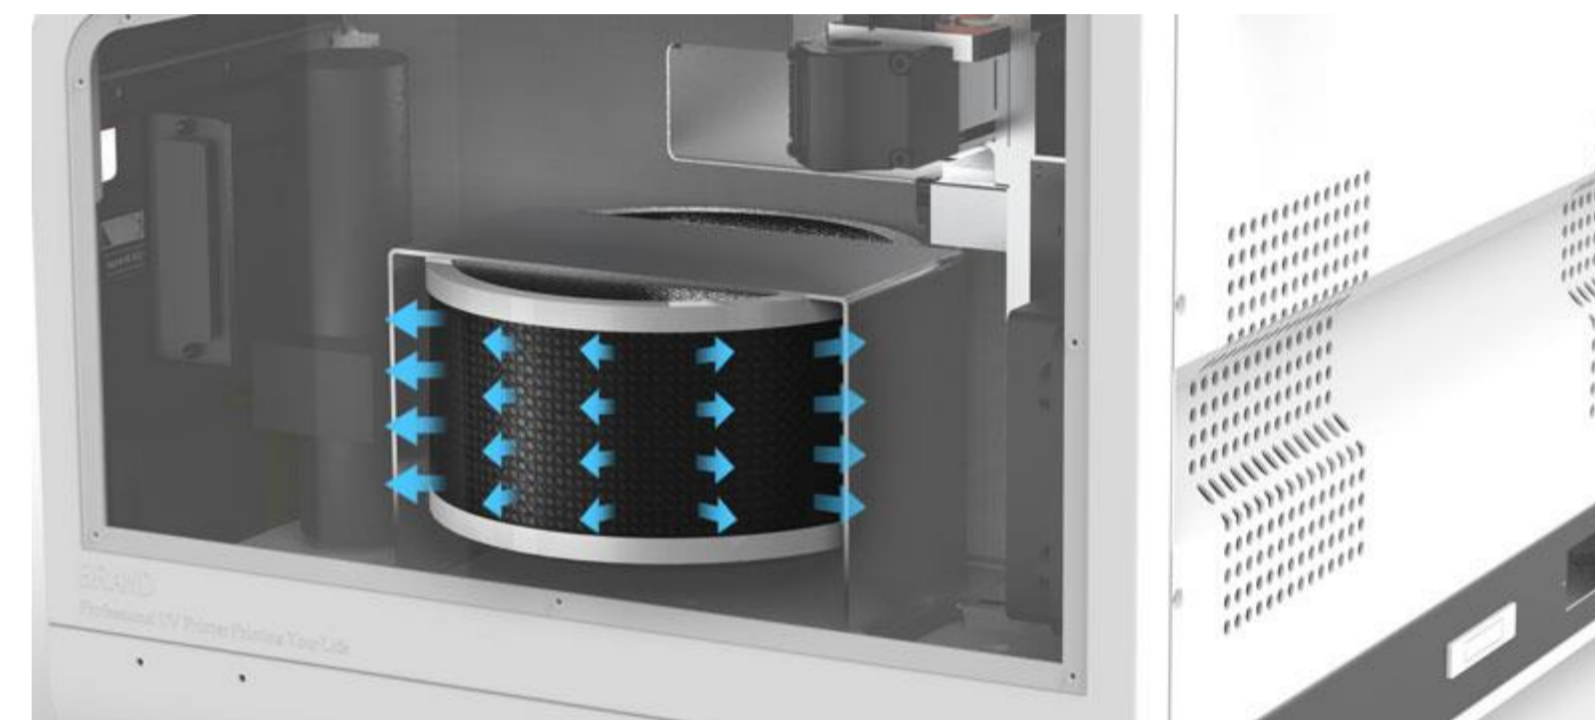

The intelligent **AIR COOLING SYSTEM** reduces the maintenance of the UV system enabling the printer as a FREE-UV Maintenance system.

Quiet Operation

As all artisJet printer users stated, they are happy about the extremely reduced noise levels. A quiet printer allows you to enjoy exceptional performance, efficiency, and productivity without the noise.

No VOC Emissions & Instant Curing

The Built-in UV LED light source dries the ink just milliseconds after it's applied, while the vacuum ink bag ensures a much cleaner operation, greatly reducing the ink sediment. Due to this, there is no release of any volatile organic compounds.

Optimized Printing

BUILT TO ADJUST TO ALL REQUIREMENTS

Ergonomic Design

Built-in UV LED curing system & Servo motor driven with patented core print engine for a compact printer.

RED STAR Design Award.

Stop-if-Open System

Safe working environment enhanced by certified Eco-Green Print Technology with Stop-On-Lid-Open System

Micro-Piezo Print Head

Piezoelectric technology Epson print head;

Precise ink shoot & fine print results;

Extended lifespan operation print head.

Smart Control Panel

Available touch screen control system & Engineer Mode for authorized operation;

Automatic height measurement & One click accurate positioning.

Reliable Printer

ENJOYING COLOR PRINTING

Ink Advantage

RISC Certified 150 ml ink cartridges with strong sustainability and accurate ink level indicator; cost effective advantage for the ink you use, and easy ink cartridges replacement.

ICCV System

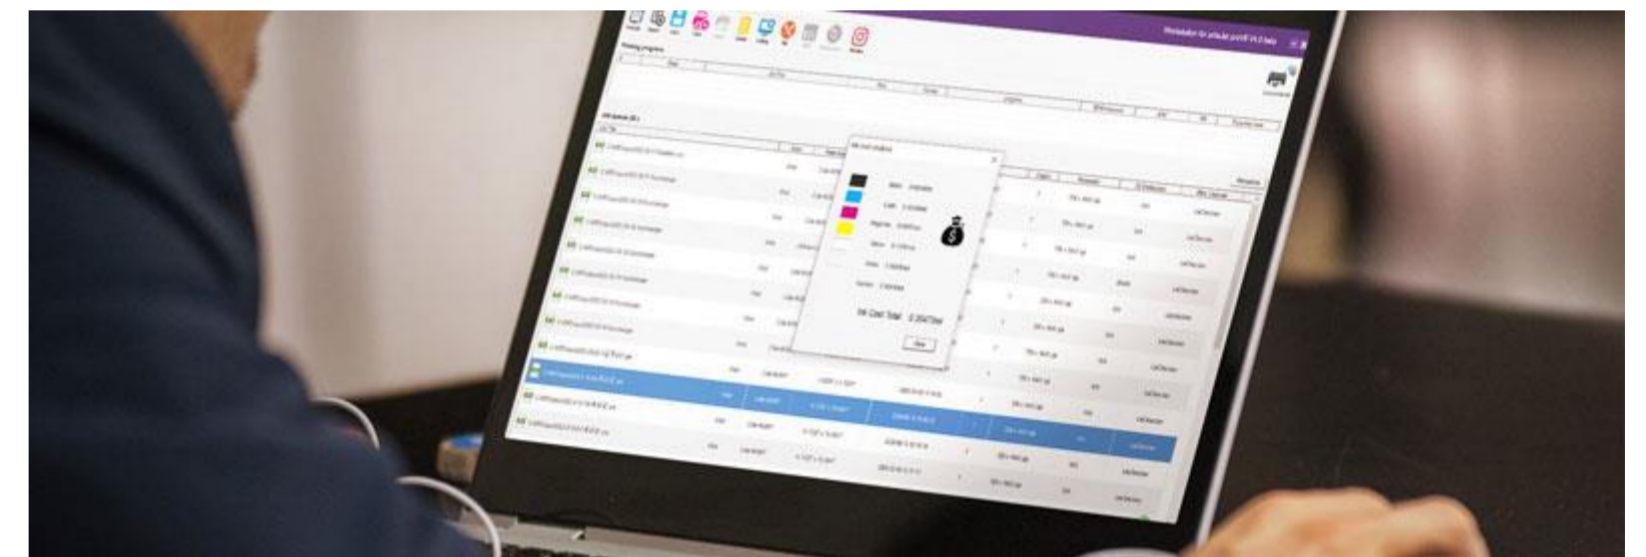

Ink Cost Calculation View and Reporting System for available ink, and number of prints.

Durable Colors

High color density & perfect gradient print finishes, initiating a strong bond with the substrate; Superior scratch & alcohol resistance, with up to 3 years outdoor durability and under continuous use.

Easy and Simple Maintenance

Automatic ink flow, ink cleaning & maintenance directly from artisJet WorkStation, in quick simple steps.

Smart Print Process

INTUITIVE OPERATION

Artwork variety

With artisJet proV6 printer you can print directly from a series of compatible artwork / images resources (.jpg, .tiff, .pdf, .eps, .psd, etc.) and various designs (real photos, graphics, emoji, stickers...).

Direct Access

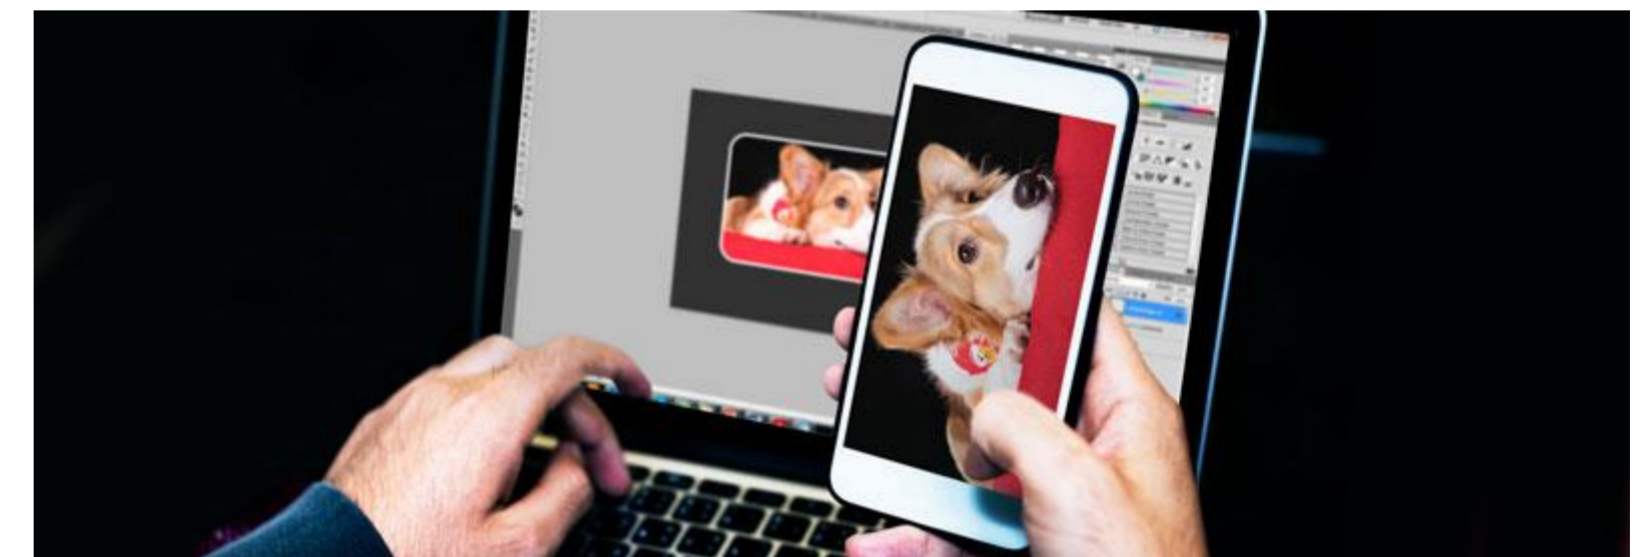

Turn your IP (Intellectual Property) design-to-print ideas into real personalized products with access to workflow information and print tasks history, directly from your computer device.

One Click Print

Unwind your creativity with digital smart printing in ONE CLICK and enhanced printing workflow by the easy software integration (from artisJet Workstation or App).

Enjoy Your Custom Product

Acquire your independence from working with a third party entity when it comes to POD (print-on-demand) and bring more value to your business and products.

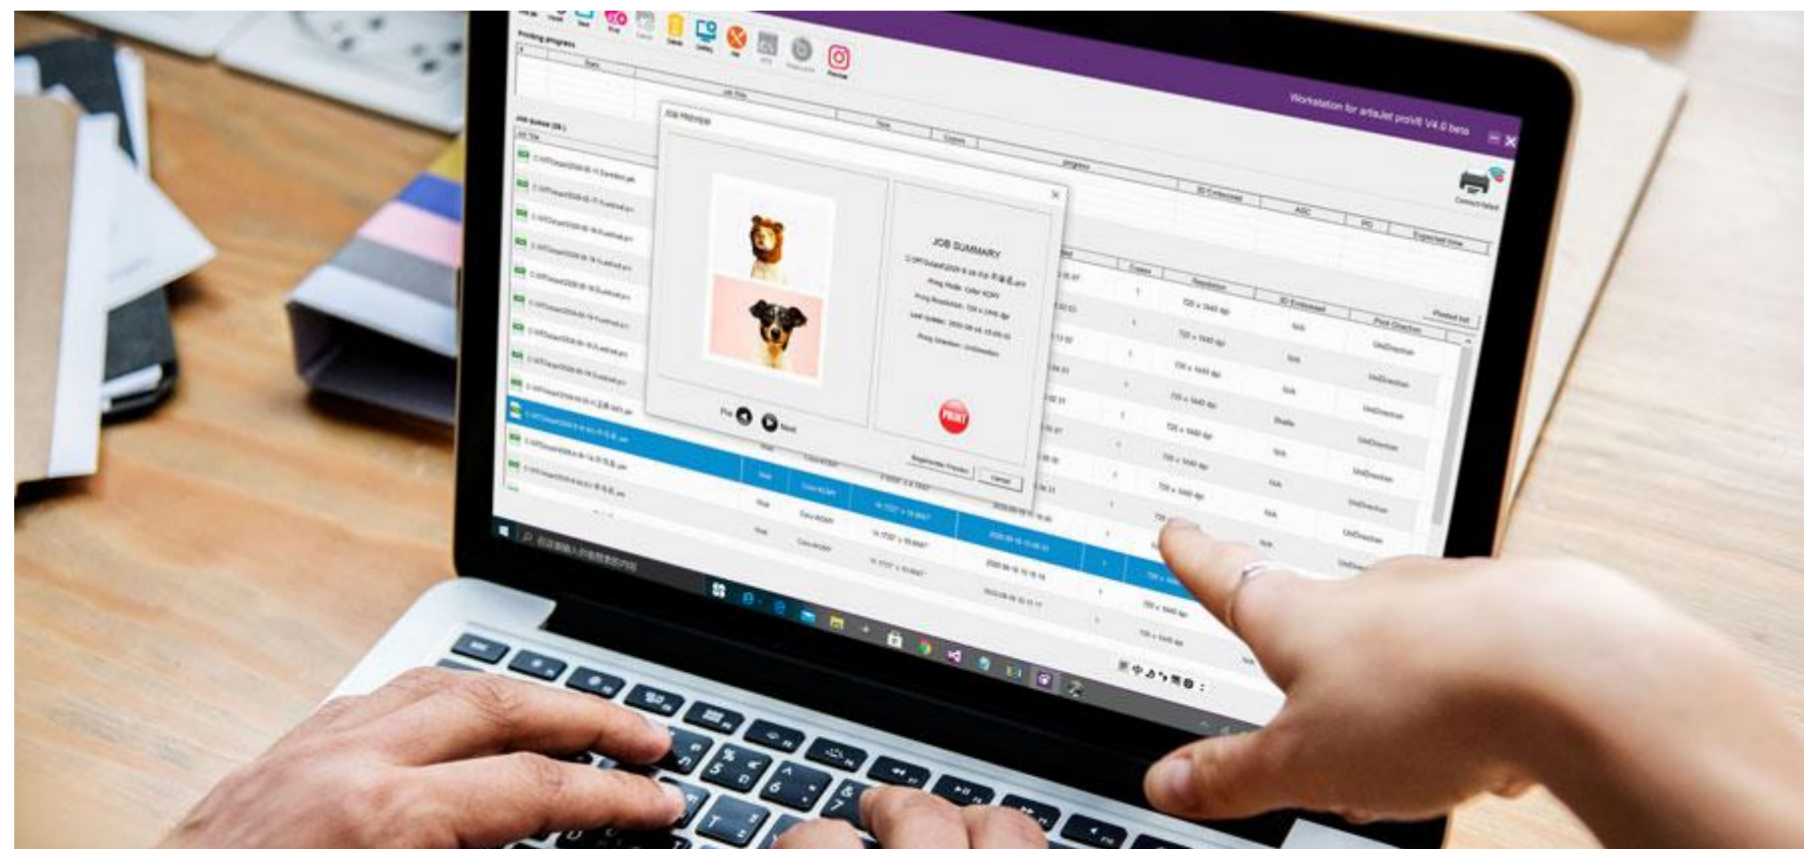

IT Integration **On Demand**
